Dropwizard

Nate Buwalda @scotchmate

04 Aug

Everyone that dislikes using Spring needs to show me a clean alternative in Java for managing dependencies and creating decoupled code.

Darrin Holst

@darrinholst

Follow

@scotchmate go retro and try the new keyword with some constructor arguments. explicit > magic. Good, clean stuff here cl.ly/2Woh2Pou451X

11:52 PM - 3 Aug 2012 from Iowa, US, United States

How'd I get here?

Dropwizard is a Java framework for developing ops-friendly, high-performance, RESTful web services.

Developed by Yammer to power their JVM-based backend services, Dropwizard pulls together stable, mature libraries from the Java ecosystem into a simple, light-weight package that lets you focus on getting things done.

Dropwizard is a **Java framework** for developing ops-friendly, high-performance, RESTful web services.
